Style Guide for APA References List

General Guidelines for References List:

- References begin on a separate page at the end of the paper
- Heading (References) is centered at the top with no underlining, italicizing or quotation marks
- Alphabetize sources by author's last name; for works without an author, alphabetize by title
- Generally, *italicize* titles of books and journals
- All lines after the first line of each source should be indented 0.5" (hanging indent)
- References are double-spaced within and between entries

For other APA format questions, copies of the *Publication Manual of the American Psychological Association*, 6th ed. are available in the library and citation help links are available on the library page of the college website http://www.willowinternationalcenter.com
